PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate (Final Year) with hands-on experience in machine learning, computer vision, and full-stack application development through academic and project work. Familiar with building and deploying AI models using PyTorch and TensorFlow, and integrating them into web applications using REST APIs, Django, and React. Seeking entry-level AI/ML Engineer or Software Engineer roles with an interest in scalable systems and real-world problem solving.

TECHNICAL SKILLS

- **Programming:** Python, Java, JavaScript, C, SQL
- **Machine Learning & AI:** Machine Learning, Deep Learning, CNNs, RNNs, LSTMs, NLP, Computer Vision, Model Evaluation, Hyperparameter Tuning
- **Frameworks & Libraries:** PyTorch, TensorFlow, Keras, Scikit-Learn, NumPy, Pandas, Matplotlib
- **Web & deployment :** HTML, CSS, Streamlit, Flask, PHP(localhost), REST APIs
- **Databases :** MySQL, MongoDB
- **Developer Tools:** Git, GitHub, VS Code, Jupyter Notebook / Google Colab, Command Line / Terminal

EXPERIENCE & PROJECTS

Wildlife Species Identification using CNN | Computer Vision

- Developed an end-to-end PyTorch CNN pipeline for automated wildlife species classification.
- Trained on a large-scale 50K animal image dataset with data augmentation and optimized hyperparameters.
- Achieved 87% test accuracy, improving generalization across unseen species.
- Designed the system for real-world conservation and biodiversity monitoring use cases.

AI-Based Story Generation | GenAI Theme

- Developed an RNN-based text generation model for coherent narrative generation.
- Implemented NLP preprocessing including tokenization, sequence padding, and vocabulary optimization.
- Deployed an interactive Streamlit web app enabling real-time AI story generation.

Full-Stack AI Platform for Wildlife Recognition

- Built an end-to-end AI-driven wildlife classification platform using a custom PyTorch CNN, identifying 100 animal species with confidence scoring and real-time inference.
- Developed and integrated Django REST APIs and a React + vite frontend to support image upload, prediction visualization, analytics, and persistent storage, resolving model loading, CORS/CSRF, and full-stack integration challenges.

HACKATHONS & CERTIFICATIONS

- Participated in AI-Driven Game Environment Generator Hackathon (Virtual World Builder).
- Advanced Machine Learning & AI – Samsung Innovation Campus
- Natural Language Processing using Azure AI – Microsoft
- Programming in Java (OOP Concepts) – IIT Kharagpur

EDUCATION

Computer Science and Engineering| Cambridge
Institute Of Technology, Bengaluru.

CGPA: 8.61 | (2022-2026)

XII Standard – Excellent PU Science College, Vijayapura.

95.66% (2022)
